EXPERIENCE

Self-Driven Learning & Academic Projects

- Gained hands-on experience in C, C++, and Java, applying object-oriented programming concepts and data structures.
- Designed and developed responsive web pages using HTML, CSS, and JavaScript.
- Built interactive single-page applications using React, focusing on component-based architecture and reusability.
- Implemented dynamic UI features such as form handling, state management, and conditional rendering in React.
- Practiced problem-solving by writing efficient algorithms and optimizing code performance.
- Debugged and tested applications to ensure reliability and smooth user experience.
- Used Git/GitHub for version control and project management.

Full Stack / Front-End Development Project Experience

- Personal Projects
- Designed and developed multiple web applications using React, JavaScript, HTML, and CSS.
- Created interactive user interfaces and responsive layouts following modern UI/UX principles.
- Integrated form validation, event handling, and conditional rendering in React.
- Practiced clean code principles and modular programming.
- Strengthened algorithmic thinking and problem-solving skills using C, C++, and Java.
